

Dynamic Full Stack Software Engineer with a background in digital marketing and analytics, I bring a wealth of experience navigating the intersection of technology and consumer engagement. This background gives me a unique edge in software engineering, as it allows me to approach technical challenges with a deep understanding of user needs and business objectives. Passionate about leveraging technology to drive business growth and enhance user experiences, I am eager to apply my blend of technical and data-driven expertise to a Full Stack Software Engineer role.

Currently enrolled on Expedia Mentorship programs with Lasantha Kularatne (Principal Software Development Engineer, Austin) and Jamie Williamson (Senior Manager, Software Development Engineering, London). References available upon request.

Work Experience

Software Development Engineer Placement	Expedia	Jan 2024–Present
Pathfinders

Projects

- **Expedia - AdCaFe:** Contributed to the development and testing of an in-house social media marketing tool designed to enhance the effectiveness of Paid Social Marketing Teams. Key Features: 1) Automated Bidding, 2) Algorithm-Based Optimization, 3) Feed Management and creative editing. Resulting in cost savings of \$2 million annually.
- **Blimp** is a personal project aimed at connecting clients with self-employed healthcare professionals. This mobile-friendly Single Page Application is being built using React.js and Redux, featuring user authentication, profile creation, messaging capabilities, appointment booking functionalities, and seamless integration with backend systems. I am currently finalizing this project as I finish my bootcamp and will provide a link to it once complete.
- **Personal Portfolio.** Link [here: https://ewan-stott-portfolio.netlify.app](https://ewan-stott-portfolio.netlify.app)
